The Birdsville

The new generation of motorhomes is here. The Birdsville is not just a luxury motorhome offering all the creature comforts of home for that tantalizing adventure out on the highways and by ways of that ever changing countryside, the Birdsville is much more – incorporating the very latest in design and safety technology to ensure your escape is as safe and pleasurable as ever.

You will be amazed how spacious the Birdsville feels yet the self contained luxury is very evident for such an affordable motorhome. You choose from the Birdsville range, the style that suits you, knowing that all Birdsville motorhomes are aerodynamically styled for economical operation and only a standard car licence is required.

Each model is well designed from years of experience in building quality motorhomes – with large comfortable beds, well equipped kitchens and ample storage space. To enhance the livability of your motorhome, the driver and passenger chairs swivel to join in the conversation unless you prefer to sit outside under the large awning and watch the world pass by. There is ample cupboard storage, drawers and a wardrobe for those other items and great external storage as well.

The Birdsville Elite

The Birdsville Elite models are a step above. Immerse yourself in luxury as you enjoy an outstanding array of features such as the electrically operated entry step, the colour reversing camera and the UHF radio found as standard equipment on every Birdsville Elite. The quality and refinement throughout every Birdsville Elite motorhome is enhanced by the luxurious ultra leather upholstery, a delight to the eye and comfortable to use. The two tone timber décor and special external decals identify your motorhome as a class above offering more space, more enjoyment. Choose comfortable envirosoff island beds, convenient in every way, or single beds affording an uninterrupted and peaceful sleep.

No matter where you are, the hot and sun drenched deserts, the cold and snow covered peaks, the turquoise elegance of tropical climes or on the highways to anywhere, your Birdsville Elite will take you in the comfort and style you justly deserve.

elite

Model C2394D

Established in 1965, Winnebago is the No.1 Motorhome Manufacturer in the Southern Hemisphere. Winnebago is an Australian owned company with a wealth of manufacturing experience in Australia for Australian conditions.

Australian built for Australian Conditions

Metal Wall, Floor and Roof Frames

The floors, walls and roof of each Winnebago motorhome consist of a fully welded metal frame to provide strength and rigidity to the motorhome body, capable of withstanding years of travel over the most uneven roads Australia has to offer. The frame is filled with a thick foam sheet which acts as an insulating material, vastly reducing road noise and assists in maintaining a moderate temperature within the motorhome. It is then laminated between two backing panels and an outer fibreglass skin, all sandwiched together using Polyurethane hot melt adhesive a process which is one of a kind in Australia.

Metal Under body protection

Unique to Winnebago are our Motorhome floors. Utilising a sandwich panel construction consisting of a one piece plywood floor laminated on foam insulated fully welded metal frame with metal underfloor protection. The metal sheeting affixed to the underside of the floor offers protection from all road surfaces.

Structural Support

Our motorhome body construction offers strength and durability, we have engineered the frame so that each panel supports the other. The motorhome floor is the key – it supports the walls as the walls are affixed to the top of the floor, not just screwed to the floor side. The roof then sits on the top of the walls thus all stress loads are shared and the body and roof gains additional strength.

Quality Control

Winnebago focuses heavily on its Quality Control processes to ensure the final product is as free of manufacturing defect as possible. We work closely with our suppliers to ensure that only quality grade material and components are used in the manufacture of each Winnebago.

Research and Development

Winnebago has invested heavily in design and engineering, both in skilled people familiar with Motorhome engineering requirements and also in computer and technical equipment incorporating the latest in design and engineering software.

Second Stage of Manufacture Compliance

All Winnebago motorhomes comply with Australian and New Zealand Governmental safety, design and self containment regulations.

RVMAA

Winnebago is a proud supporter and member of the Recreational Vehicle Manufacturers Association of Australia, the industry organisation tasked with ensuring the Motorhome Industry is at the forefront of professionalism and quality.

The Winnebago Guarantee – 5 years and a million reasons to think Winnebago

Winnebago motorhomes are protected by a market leading 2 year or one million kilometre warranty on Winnebago manufactured components* and a 5 year structural warranty on the motorhome body*. Combine that with the support and warranty offered by our chassis and component suppliers and a two year emergency roadside assist plan, and you can enjoy your Winnebago motorhome lifestyle with the peace of mind that we are behind you all the way. * Refer to warranty policy manual for terms and conditions. Commercial usage warranty terms differ.
