## Menindee – Sophistication Personified

The Winnebago Menindee is the epitome of absolute luxury, a sophisticated motorhome for the discerning, adventurer offering comfort, style and a list of standard inclusions the envy of many.

The Menindee has a stylish contemporary interior with clean lines, created for connoisseurs of modern design. Fitted with two slide-out rooms allowing you the extra space you are accustomed to at home – at the push of a button the rear lounge area converts to a comfy queen size bed with plenty of walk around area and the living space expands in size allowing you room for any additional guests.

Sink back into the comfortable ultra leather lounge or swivel chairs for a perfect view of one of the two interior LCD TV's or reach for a drink and venture outside under the large electronically controlled awning and watch nature or a different TV program than what is being shown inside.

The kitchen is fully equipped for even the most discerning chef; whip up a snack or cook up a storm, all your food is kept fresh in the two door refrigerator/freezer. Wash away the days adventures with a steaming hot shower in the generous bathroom which is separate to the residential style porcelain base toilet.

Winnebago is known for its excellent quality construction and the Menindee is no exception. Cleverly engineered to accommodate high end features in a smaller space, car like to drive and convenient to park. Powered by the Mercedes Benz, 6 cylinder intercooled turbo diesel engine. It has a 5 speed fully automatic transmission to tackle Australia's diverse countryside.

The gleaming fully painted exterior styling makes a statement on the road or parked in any driveway. You will be surprised by the amount of storage space both inside and out.

***The Menindee is your ticket to freedom and your luxurious home on the road.***

*Established in 1965, Winnebago is the No.1 Motorhome Manufacturer in the Southern Hemisphere. Winnebago is an Australian owned company with many years manufacturing experience in Australia for Australian conditions.*

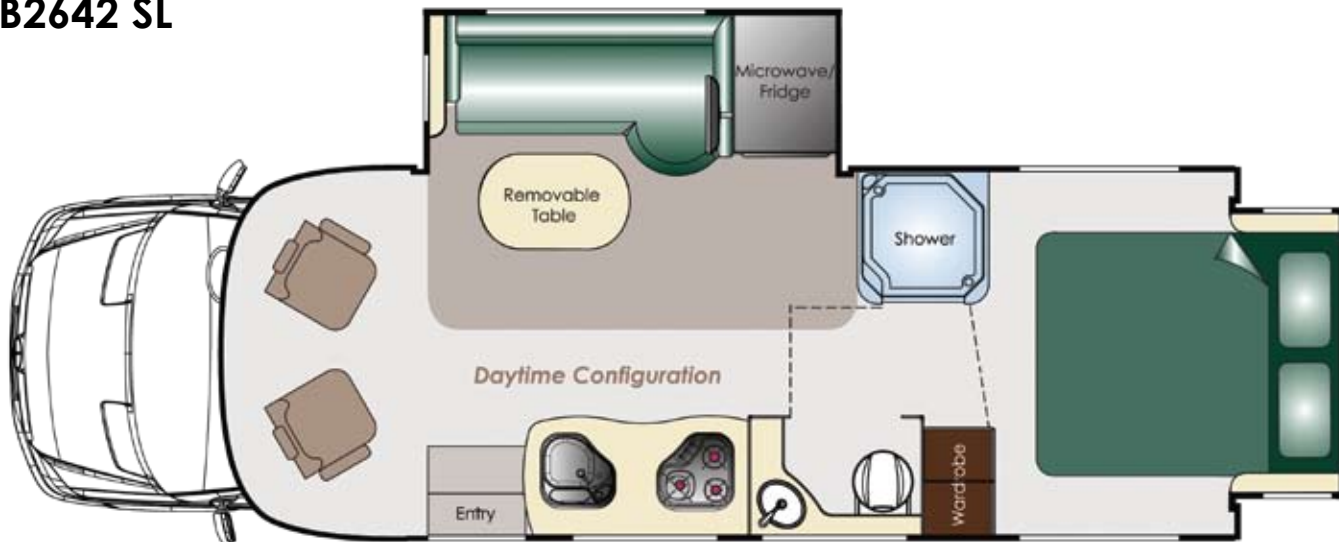

## Motorhome specifications

Model	B26442 SL

# Australian built for Australian Conditions

## Metal Wall, Floor and Roof Frames

The floors, walls and roof of each Winnebago motorhome consist of a fully welded metal frame to provide strength and rigidity to the motorhome body, capable of withstanding years of travel over the most uneven roads Australia has to offer. The frame is filled with a thick foam sheet which acts as an insulating material, vastly reducing road noise and assists in maintaining a moderate temperature within the motorhome. It is then laminated between two backing panels and an outer fibreglass skin, all sandwiched together using Polyurethane hot melt adhesive a process which is one of a kind in Australia.

## Metal Under body protection

Unique to Winnebago are our Motorhome floors. Utilising a sandwich panel construction consisting of a one piece plywood floor laminated on foam insulated fully welded metal frame with metal underfloor protection. The metal sheeting affixed to the underside of the floor offers protection from all road surfaces.

## Structural Support

Our motorhome body construction offers strength and durability, we have engineered the frame so that each panel supports the other. The motorhome floor is the key – it supports the walls as the walls are affixed to the top of the floor, not just screwed to the floor side. The roof then sits on the top of the walls thus all stress loads are shared and the body and roof gains additional strength.

## Quality Control

Winnebago focuses heavily on its Quality Control processes to ensure the final product is as free of manufacturing defects as possible. We work closely with our suppliers to ensure that only quality grade material and components are used in the manufacture of each Winnebago.

## Research and Development

Winnebago has invested heavily in design and engineering, both in skilled people familiar with Motorhome engineering requirements and also in computer and technical equipment incorporating the latest in design and engineering software.

## Second Stage of Manufacture Compliance

All Winnebago motorhomes comply with Australian and New Zealand Governmental safety, design and self containment regulations.

## RVMAA

Winnebago is a proud supporter and member of the Recreational Vehicle Manufacturers Association of Australia, the industry organisation tasked with ensuring the Motorhome Industry is at the forefront of professionalism and quality.

## The Winnebago Guarantee – 5 years and a million reasons to think Winnebago

Winnebago motorhomes are protected by a market leading 2 year or one million kilometre warranty on Winnebago manufactured components\* and a 5 year structural warranty on the motorhome body\*. Combine that with the support and warranty offered by our chassis and component suppliers and a two year emergency roadside assist plan, and you can enjoy your Winnebago motorhome lifestyle with the peace of mind that we are behind you all the way. \* Refer to warranty policy manual for terms and conditions. Commercial usage warranty terms differ.

# Standard features and options
